## Objective

Aspiring Full Stack Developer passionate about building scalable and efficient applications using the PERN stack. Enthusiastic about problem-solving and eager to apply my skills to real-world projects

---

## Projects

### Voting Website

**Technologies used:** Node.js, PostgreSQL, React.js, Express.js, JWT, API, Bcrypt.js

- Developed a full-stack voting platform with secure authentication and authorization using JWT.
- Designed a responsive UI/UX for a seamless user experience.
- Deployed the application for global access.
- Impact: -This project simplifies and digitizes the voting process, making it more accessible, secure, and transparent. It can be used for elections, organizational decisions, educational institutions, and online polls, ensuring fair voting.
